We acknowledge the help of the Fonds National de Recherche Scientifique (F.R.S.-FNRS), the ARC ‘A World in Crisis?’, the Institute for Civilisations, Arts and Letters (INCAL) of the UCLouvain and the Centre for the Study of Ancient Worlds (CEMA) for providing the necessary financial support for the workshop.

Heartfelt thanks go to Sylvie De Dryver and Anne Quérinjean for the possibility to organize the event in the precincts of the Musée L at Louvain-la-Neuve, and to Nicolas Kress, Nicole Buche, Nathalie Coisman, Sabine Finné, Sonia Henrot, Frédéric Verolleman and the members of the Aegis Research Group for administrative and logistic support, and for practical help during the workshop.

The proceedings have benefitted from the support of the Ulrike Wulf-Rheidt Stiftungsfonds, the Institute for Civilisations, Arts and Letters (INCAL) and the Centre for the Study of Ancient Worlds (CEMA) of the UCLouvain.

List of Illustrations

Fig. i	Trilithon construction at the Lebena Gerokampos circular tomb (a) and large, upright slabs in the Early Minoan House Tombs at Mochlos (b) (photographs by the author)	xxviii
Fig. ii	Prepalatial retaining wall of massive limestone boulders (marked with arrows) within the west façade on the court of the Court-Centered Building at Sissi (courtesy of the Belgian School at Athens; photograph by the author)	xxix
Fig. iii	Carefully trimmed blocks in the Northwest Platform at Knossos (photograph by the author)	xxix
Fig. 1.1	Terminology related to the different parts of ashlar components (a) and their integration within ashlar masonry (b), where the face is a surface delimiting the block, and edge (1, 2 or 3) is the line of encounter between two surfaces (drawings M. Devolder, after the definitions provided in Ginouvès & Martin 1985: 57, 58, 103)	2
Fig. 1.2	Ashlar blocks with contact limited to the vertical edges of the outer face and part of the joint face (rising joints), Maroni, Cyprus (courtesy of G. Cadogan; photograph by J. Driessen)	3
Fig. 1.3	Sandstone quarries with channel-extraction technique at Pelekita (a) and Malia (b), Crete, used in the Late Bronze Age Palaces at Kato Zakros and Malia; conglomerate outcrop on the Malia shore, Crete, very likely exploited for use in the Middle and Late Bronze Age settlement (c); and grey-black crystalline limestone outcrop with natural bedding in Milatos, Crete, a type of stone used for specific building components in the Middle Bronze Age Palace at Malia (d) (photographs by M. Devolder)	4
Fig. 1.4	Hazor, Ceremonial Precinct. Top of orthostates as found during excavation, with black layer containing charred remains of cedar, looking west (courtesy of The Selz Foundation Hazor Excavations in Memory of Yigael Yadin)	7
Fig. 1.5	Ashlar masonries: ashlar blocks as corner stones (a, Ugarit, Syria); ashlar blocks forming the thickness of the wall (b, Quartier Mu, Malia, Crete); rubble-backed ashlar (c, Malia Palace, Crete); shell-wall or two-faced ashlar masonry (d, Knossos Palace, Crete) (photographs by Anton_Ivanov/shutterstock.com [a] and M. Devolder [b-d])	8
Fig. 1.6	Map of the Eastern Mediterranean with the main sites using ashlar addressed in the text (I. Kreimerman)	9
Fig. 1.7	Saqqara, six-stepped pyramid of Djoser. Partial view of the pyramid (a) and detailed (b) view of the masonry (photographs by YuriIT/shutterstock.com [a] and Petr Bonek/shutterstock.com [b])	12
Fig. 1.8	Limestone blocks depicting a building scene in relief of the Amarna Period. On the left one, an individual transports what might be a <i>talatat</i> block on his shoulder (courtesy of the Brooklyn Museum)	13
Fig. 1.9	Entrance to the southern tower of the 7 th Pylon at the Amun Temple in Karnak, erected by Thutmosis III, looking northwest (photograph by Anton_Ivanov/shutterstock.com)	14
Fig. 1.10	Entrance to the 3 rd Pyramid, probably constructed by Menkaure (4 th Dynasty), Gizah, looking south. The core is made of roughly cut limestone blocks while the visible casing is made of granite. Note that aside from the entrance area, most of the casing is in unfinished condition, thus showing the original bossed state of the rocks and the lifting bosses (photograph by Giovanni_Zacchini/shutterstock.com)	15

Fig. 1.11	Limestone upright standing slab at the Gate of Tell Bderi, looking northeast. Note additional fragments lying in the gate passage (courtesy of H. Kühne, Tell Sheikh Hamad Archive, Freie Universität Berlin)	17
Fig. 1.12	Tell Banat, Tomb 7. View from Chamber F to Chamber B through Passage B, looking south (a); niche for placing objects (b); view from Chamber D to Chamber C, looking east (c); view from Chamber C to Chamber D, looking west (d) (photographs T. McClellan, Banat Excavation Project)	18
Fig. 1.13	Hazor, Ceremonial Precinct. Basalt orthostates on the northern (external) side (courtesy of The Selz Foundation Hazor Excavations in Memory of Yigael Yadin)	21
Fig. 1.14	Hazor, Podium Area, looking east. The slabs are orthostates in secondary use. Note the four holes on the upper surface of the podium (courtesy of The Selz Foundation Hazor Excavations in Memory of Yigael Yadin)	22
Fig. 1.15	Hazor, Orthostates Temple. General view, looking southwest (a; courtesy of The Selz Foundation Hazor Excavations in Memory of Yigael Yadin); orthostates of the northern wall of the holy of holies, looking east (b; photograph by I. Kreimerman)	22
Fig. 1.16	Hazor, Orthostates Temple. The lion orthostate found buried in a pit at the entrance to the temple, after it was lifted up by the excavators, looking east (courtesy of The Selz Foundation Hazor Excavations in Memory of Yigael Yadin)	23
Fig. 1.17	Tel Megiddo, the gate of Strata VIII-VII, looking south (courtesy of D. Ussishkin)	25
Fig. 1.18	Phaistos, Middle Bronze Age Palace. Orthostates in the west façade (northern section, Middle West Court) (photograph by M. Devolder, with the permission of P. Militello)	28
Fig. 1.19	Malia, Late Bronze Age Palace. Protopalatial ironstone blocks reused in the Neopalatial edifice: detailed views of the pecking marks created by the use of percussive stone tools on the reused blocks (a-b), and general view of the walls of the Neopalatial 'Dungeon' (Area V) reusing such blocks (c) (photographs by M. Devolder)	30
Fig. 1.20	Tylissos, Villa A. View of the western part of the Minoan Hall: general view of the west ashlar wall, looking west (a), and detailed view of the encounter between the west and south walls, looking southwest (b) (photographs by J. Driessen)	31
Fig. 1.21	Undated photographs of masons' marks on the ashlar sandstone blocks of the Neopalatial Palace at Malia, with the deeply carved signs still clearly visible on the soft, porous sandstone (courtesy of the French School at Athens)	32
Fig. 1.22	Boğazköy, Temple 1. Ashlar blocks forming the thickness of the walls. Note the holes for clamps on the upper face of the blocks (photograph Nejdett_Duzen/shutterstock.com)	38
Fig. 1.23	Eflatun Pinar, Spring Sanctuary bordered with ashlar walls (photograph by Northern_Imagery/shutterstock.com)	39
Fig. 1.24	Alassa-Paliothaverna, Building II. View of cut-stone blocks with drafted margins and bosses (photograph by P. Sapirstein)	41
Fig. 1.25	Tiryns, Megaron. West anta of the porch, south face, showing pendulum saw marks (photograph by M. Devolder)	44

Fig. 2.1	Examples of ashlar mural styles in Aegean iconography, not to scale (drawings by the author); A: ‘Town Mosaic’ (after Evans 1921: fig. 226, facing p. 306); B: Ivory plate from Knossos (after Lembesi 1977: pl. 16c); C: ‘Sanctuary rhyton’ from Kato Zakros (after Marinatos & Hirmer 1973: 145, fig. 20); D: Stone plate from Pseira (after Lembesi 1977: pl. 16d); E: Mural painting from Xeste 3, Akrotiri, Thera (after Alexopoulos 2008: 390, fig. 1); F: Terracotta model from Piskokefalo (after Rutkowski 1981: 38, fig. 9); G: Miniature fresco from Tyliossos (after Shaw 1972: 179, fig. 9); H: Terracotta model from Ayia Triada (after Lembesi 1977, pl. 16e); I: Mural painting from the ‘House of the Oil Merchant’, Mycenae (after Bennett 1958: fig. 42)	75
Fig. 2.2	Fragment of a jar from Knossos (Cadogan 2011: 149, fig. 9)	76
Fig. 2.3	Town IV of the miniature frieze from the West House at Akrotiri, Thera (Doulas 1992: 71-72, fig. 36)	76
Fig. 2.4	Golden sheet from Kapakli-Volos (Avila 1983: 24, fig. 4.4)	77
Fig. 2.5	Terracotta model from the ‘Loomweight Basement’, Knossos (Schoep 1994: 191, fig. 4)	77
Fig. 2.6	Temple miniature fresco, Knossos (Cameron 1987: 326, fig. 9)	78
Fig. 2.7	Fragments of the Megaron frieze, Mycenae (Lamb 1921-1923: pl. XLII)	79
Fig. 2.8	Pictorial sherd from Tiryns (Slenczka 1974: 28, fig. 8)	79
Fig. 2.9	Façade of the chamber tomb at Megalo Kastelli, Thebes (Spyropoulos & Chadwick 1975: pl. XXVIII.121)	80
Fig. 2.10	Mural decoration of Room H in the ‘House of the Frescoes’ at Knossos (Evans 1928: 443, fig. 260)	81
Fig. 2.11	Town V of the miniature frieze from the West House at Akrotiri, Thera (Televantou 1990: 321, fig. 14)	82
Fig. 2.12	Seal image from Kato Zakros (<i>CMS</i> II7, n° 218)	83
Fig. 2.13	Seal image from Kato Zakros (<i>CMS</i> II7, n° 74)	83
Fig. 2.14	Sanctuary rhyton from Kato Zakros (Rutkowski 1986: 83, fig. 94)	84
Fig. 2.15	Stone vessel fragment from Knossos (Evans 1928: 752, fig. 486)	85
Fig. 2.16	Mural painting in Xeste 3 at Akrotiri, Thera (Marinatos 2016: pl. Vb)	86
Fig. 2.17	Ashlar wall of Room 22 in ‘Villa A’ of Ayia Triada (Shaw 2015: 127, fig. 4.43)	86
Fig. 2.18	Stone vessel fragment from Knossos (Evans 1928: 614, fig. 386)	87
Fig. 2.19	Seal-stone in the Metropolitan Museum, New York (<i>CMS</i> XII, n° 249)	87
Fig. 2.20	Faience plaques of the ‘Town Mosaic’, Knossos (Palyvou 2008: 43, fig. 10)	89
Fig. 2.21	Ashlar wall in corridor 41 of the Palace of Phaistos (Pernier & Banti 1951: 225, fig. 139)	90
Fig. 3.1	Topographic map of Ebla with schematic plans of the Middle Bronze Age I-II buildings (Missione Archeologica Italiana in Siria)	99
Fig. 3.2	Detailed plan of the first two rooms of the Damascus Gate in Ebla (Missione Archeologica Italiana in Siria)	101

Fig. 3.3	Axonometric view of the Damascus Gate (Area A) in Ebla (Missione Archeologica Italiana in Siria)	102
Fig. 3.4	Ebla, Damascus Gate, looking east. In the upper right part of the photograph, traces of the guards' walkway on top of the rampart, over the remains of the stone defense tower (Missione Archeologica Italiana in Siria)	103
Fig. 3.5	Ebla, Royal Citadel, Northwest Wing, looking northeast. Upper left of the photograph, the orthostates in place against the north wall of court L.156; in the center of the photograph, the paved space with the stone basin in place (Missione Archeologica Italiana in Siria)	104
Fig. 3.6	Ebla, Southern Palace, looking north. The North Wing and, in the background, the stone wall of the Citadel fortification (Missione Archeologica Italiana in Siria)	104
Fig. 3.7	Ebla, Southern Palace, looking southeast. General view, with the stables in the foreground and the two entrances in the background (Missione Archeologica Italiana in Siria)	105
Fig. 3.8	Ebla, Southern Palace. Schematic plan (Missione Archeologica Italiana in Siria)	106
Fig. 3.9	Ebla, Western Palace. Detailed axonometric view with Courtyard L.2950 in the center (Missione Archeologica Italiana in Siria)	107
Fig. 3.10	Ebla, Western Palace. Courtyard L.2950, looking north (Missione Archeologica Italiana in Siria)	108
Fig. 3.11	Ebla, Western Palace. South wall of Room L.3145, looking south, with the mudbricks creating a geometric decorative pattern (Missione Archeologica Italiana in Siria)	108
Fig. 3.12	Ebla, Western Palace. Detail of the entrance leading from Courtyard L.2950 to the northeast ceremonial sector of the building, looking east (Missione Archeologica Italiana in Siria)	109
Fig. 3.13	Ebla, Western Palace. Detailed plan of the northeast sector, with mudbricks of various colors, the outer stone orthostates and the Byzantine furnace (Missione Archeologica Italiana in Siria)	110
Fig. 3.14	Ebla, Western Palace. Architectural section of the north façade, with the megalithic orthostates (Missione Archeologica Italiana in Siria)	110
Fig. 3.15	Ebla, Archaic Palace. General view, looking southwest (Missione Archeologica Italiana in Siria)	112
Fig. 3.16	Ebla, Royal Citadel. The Northwestern Quarter, with the western perimeter wall, against which meagre stone structures were built during the Late Bronze Age (Missione Archeologica Italiana in Siria)	113
Fig. 3.17	Ebla, Royal Citadel. Detail of the south fortification wall, looking east (Missione Archeologica Italiana in Siria)	113
Fig. 3.18	Ebla, Royal Citadel. The mudbrick escarp of the eastern fortification, looking south (Missione Archeologica Italiana in Siria)	114
Fig. 3.19	Ebla, Western Palace. General view, looking southeast (Missione Archeologica Italiana in Siria)	115
Fig. 3.20	Ebla, Northern Palace. Detail of the passageways among the rooms of the North Wing, looking northwest (Missione Archeologica Italiana in Siria)	116
Fig. 3.21	Ebla, Basalt statue of a sitting king, found in the region of the Damascus Gate (Missione Archeologica Italiana in Siria)	118
Fig. 4.1	Plan of Gournia. Areas where ashlar have been found at the site are indicated in blue (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	122

Fig. 4.2	Gournia, Palace area. Areas where ashlar have been found in the Palace area are indicated in pink (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	123
Fig. 4.3	Gournia, Palace, looking east (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	124
Fig. 4.4	Plan of the Palace area, plotting Middle Minoan II monumental, white, crystalline metalimestone walls (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	125
Fig. 4.5	View of Protopalatial monumental white crystalline metalimestone masonry fabric (photograph by J. Spiller)	126
Fig. 4.6	Plan of the Palace area. Middle Minoan IIIA walls depicted in brown (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	127
Fig. 4.7	View of Room 13 in the Palace, looking west (photograph by J. Spiller)	128
Fig. 4.8	Ashlar materials: calcarenite (a); sandstone (b); conglomerate (c) (photographs by J. Spiller)	129
Fig. 4.9	Palace of Gournia, view of the West Façade, looking east (photograph by J. Spiller)	131
Fig. 4.10	Palace of Gournia, West Façade, view of junction between Middle Minoan II and Late Minoan IB masonry styles (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	131
Fig. 4.11	Palace of Gournia, view of Southwest Façade (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	132
Fig. 4.12	Palace of Gournia, view of Portico, looking west (photograph by the authors)	133
Fig. 4.13	Palace of Gournia, view of the 'Central Hall' (Space 21), looking east (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	134
Fig. 4.14	Palace of Gournia, timber framework reconstruction, Room 24 (image by the authors)	135
Fig. 4.15	Gournia, House Ha, reused sandstone ashlar (photograph by the authors)	136
Fig. 4.16	Gournia, House Dd, ashlar pile in Room 32 (photograph by the authors)	137
Fig. 4.17	Gournia, House Hd, Rooms 27a and 29, depicting Neopalatial 'stratification'. The white line denotes the division of walls, with the lower being constructed earlier than the upper (photograph by J. Spiller)	139
Fig. 4.18	Gournia, Neopalatial 'stratification'. The purple circles denote areas where significant stratification of walls has been identified (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	140
Fig. 4.19	Gournia, 'outside-in' wall from House Ab. The wall depicted was formerly the exterior northern façade of House Ac. It was later incorporated into House ab when it was expanded (photograph by J. Spiller)	141
Fig. 4.20	Gournia, 'outside-in' houses (image by D.M. Buell, J.C. McEnroe, J. Botero & R. Bieńkowski)	142
Fig. 5.1	Map of Anatolia, with the main Bronze Age sites (map by the author)	147
Fig. 5.2	Kültepe, Palace foundations (after Özgüç 1999: pl. 16)	149
Fig. 5.3	Alişar, Level 10 T, dado slabs on the southern façade of the so-called 'maison' (after Von der Osten 1937: 17, fig. 10)	149
Fig. 5.4	Harput carved relief orthostate (Demir <i>et alii</i> 2016: 5, fig. 3)	150

Fig. 5.5	Plan of Tell Atchana Level VII Yarim Lim's Palace with the orthostate walls marked in blue (a), and view of the entrance to Room 7 (b) (modified from Woolley 1955: fig. 35 & pl. XIIIc)	151
Fig. 5.6	Level VII City Gate in Tell Atchana (after Woolley 1955: pl. XXIXa)	152
Fig. 5.7	Cyclopean masonry of the outer wall of Tilmen Höyük (after Duru 2003: pl. 14.2)	153
Fig. 5.8	Tilmen Höyük. Views of the outer walls of the staircase block of Building A adorned with small orthostates (a); Gate of Building A (b) (Duru 2003: pls 25.2, 26.1)	153
Fig. 5.9	Staircase and shaft below Room 17 in Tell Atchana (after Woolley 1955: pl. XXa)	154
Fig. 5.10	Tilmen Höyük. Ashlar masonry in the retaining wall of the inner city's fortification (Duru 2003: pl. 15.2)	155
Fig. 5.11	Karkemish. Ashlar masonry of the 'River Wall' of the inner town (after Woolley 1921: pl. 15a)	156
Fig. 5.12	Karkemish. South Gate of the inner town (after Woolley 1921: pl. 13a)	157
Fig. 5.13	Tell Atchana Palace Level IV, with the orthostates lining the lower part of the mudbrick walls marked in blue (modified from Woolley 1955: fig. 44)	158
Fig. 5.14	Carved orthostate from Büyükkale in Boğazköy (after Darga 1992: fig. 131)	159
Fig. 5.15	Polygonal masonry at the Lion's Gate in Boğazköy (after Seeher 2002a, fig. 4)	160
Fig. 5.16	Geared blocks in the socle of the east wall of Temple 3 in Boğazköy (after Seeher 2009: fig. 18)	161
Fig. 5.17	Geared masonry behind the orthostate wall facing the inner city in Alaca Höyük (Darga 1992: fig. 137)	161
Fig. 5.18	Boğazköy. Ashlar masonry of Temple 2 (after Seeher 2012: fig. 9)	162
Fig. 5.19	Boğazköy. Südburg, Chamber 2 (after Seeher 2009: fig. 34)	163
Fig. 5.20	Troy VI. East Gate, Tower and East Wall (after Bittel 1976: fig. 135)	163
Fig. 6.1	Map of the Southern Levant marking the sites mentioned in the text (map by the author)	170
Fig. 6.2	Tel Ishfar, <i>maṣeba</i> in secondary use: Phase E (a), looking south and Phase B (b), looking east (courtesy of the Ifshar expedition)	171
Fig. 6.3	Tel Gezer, <i>maṣebot</i> , looking north (photograph by the author)	172
Fig. 6.4	The Canaanite Gate at Ashkelon with original ashlar <i>in situ</i> , looking south (photograph by the author)	173
Fig. 6.5	The North Gate at Ashkelon, phases 14 (a), 13c (b) and 13 a-b (c) (courtesy of the Leon Levy Expedition to Ashkelon)	174
Fig. 6.6	Tel Gezer. The west (a) and east (b) walls of the Middle Bronze Age III Gate, looking north towards the city (photographs by the author)	175
Fig. 6.7	Tel Gezer. The south face of the middle western orthostate of the Middle Bronze Age III Gate, showing the rubble stones above and behind it (photograph by the author)	176
Fig. 6.8	The Middle Bronze Age East Gate of Shechem (Stratum XV), view to the southeast, note that the piers are formed by orthostates (courtesy of the NPAPH Project)	177
Fig. 6.9	Lachish, Palace. Dressed stones in Wall 253 overlooking the courtyard (a), and further east onto Room 3125 (b), looking southeast (photographs by the author)	179

Fig. 6.10	Tel Kabri, Orthostates Building. Aerial view (courtesy of the Tel Kabri Expedition)	181
Fig. 6.11	Tel Kabri, Orthostates Building. View of two perpendicular orthostates, the back face of one partly worked so that they fit better together, looking north (a); detailed view showing one rectangular dowel hole and the floor plaster continuing over the dressed stone, looking south (b) (courtesy of the Tel Kabri Expedition)	182
Fig. 7.1	Menelaion. Ashlar block (photograph by the author)	188
Fig. 7.2	Pylos, southwestern façade of Building X. Southwest Quadrant, elevation of pseudo-ashlar masonry (Nelson 2017: 314, fig. 3.24)	189
Fig. 7.3	Pylos, Main Building. Orthostate wall in Room 7 (Nelson 2017: fig. 3.26)	190
Fig. 7.4	Pylos. Disposition of orthostate blocks (in blue) relative to general plan of the Palace (modified from Nelson 2017: fig. 4.2)	190
Fig. 7.5	Pylos. Plan of Late Helladic IIIA Palace (modified from Nelson 2017: fig. 4.4)	191
Fig. 7.6	Mycenae, Circle B, Tomb Rho. View of interior of tomb (courtesy of the Athens Archaeological Society; Mylonas 1973: pl. 195 β)	192
Fig. 7.7	Palace of Tiryns, northeast corner of Main Court, block A12 (photograph by the author)	193
Fig. 7.8	Pylos, Palace. northeastern façade (drawing by the author)	194
Fig. 7.9	Mycenae, Tsountas' House. Drawing of northeast (a) and southwest (b) antae (after Küpper 1996: fig. 23)	195
Fig. 7.10	Mycenae, plan of Late Helladic IIIA2 circuit and probable ramp and gate system (modified from Wardle 2015: fig. 3 and Mylonas 1966 with terrace wall TW; drawing by the author)	195
Fig. 7.11	Mycenae, poros blocks with swallowtail cuttings: Loose block, exact provenance unknown (a); loose poros block found against the interior of the North Cyclopean Wall, exact provenance unknown (b) (photographs by the author)	196
Fig. 7.12	Mycenae, Treasury of Atreus. Gable-shaped coping stone (indicated by arrow) from poros ashlar retaining wall (courtesy of the British School at Athens; after Wace 1940: pl. IV)	197
Fig. 7.13	Mycenae, Tomb of Klytemnestra. Section of Great Poros Wall (courtesy of the British School at Athens; Taylour 1955: pl. 40.d)	198
Fig. 7.14	Mycenae, Tomb of Klytemnestra. Poros ashlar blocks closing the dromos (photograph by the author)	198
Fig. 7.15	Pylos, Palace. Beam impressions atop ashlar course with mortises before Court 3 (photograph by the author)	199
Fig. 7.16	Mycenae, Palace. Ashlar wall of porch façade of the Megaron: drawing (a) and view, looking east (b) (drawing and photograph by the author)	200
Fig. 7.17	House of Kadmos, Thebes. Ashlar wall of porch façade: drawing (a) and view (b) (drawing and photograph by the author)	201
Fig. 7.18	Drain covers: view of drain cover at Pylos (a); view of poros limestone drain cover in XXXIIa, Tiryns (b); View of drain, House of Columns, Mycenae (c) (photographs by the author); plan of drains at Tiryns (d) (Müller 1930: fig. 76)	203

Fig. 7.19	Mycenae, Grave Circle A. Limestone slabs and mortise cutting of the ring (photograph by the author)	206
Fig. 7.20	Lion Gate at Mycenae. View of the eastern flanking wall (yellow indicates modern restoration, following Mylonas 1962: pls 33-34) (a); view of the western flanking wall (b); view of the Gate (c) (photographs by the author)	207
Fig. 7.21	Mycenae, Tsountas' House. Drawing of beam emplacements in pier-wall, on the basis of the standing architectural remains (drawing by the author)	208
Fig. 7.22	Tiryns, eastern flanking wall of the 'Steintor'. Quadrilateral, coursed Cyclopean limestone blocks (photograph by the author)	208
Fig. 7.23	Gla, South Gate. Quadrilateral, coursed blocks (photographs by the author)	209
Fig. 7.24	Tiryns, East Gate. Hammer-dressed corner blocks (photograph by the author)	209
