Congratulations to Dr. Catherine McCammon's IBAME Science Award!

In recognition of Dr. Catherine McCammon's outstanding achievements in Mössbauer research, she received the IBAME (International Board on the Applications of the Mössbauer Effect) science award at ICAME (International Conference on the Applications of the Mössbauer Effect) in St. Petersburg, Russia, in 2017. On behalf of the whole MEDC (Mössbauer Effect Data Center) staff, here once again I give my greetings and warmest congratulations to Dr. Catherine McCammon for this prestigious award.

Dr. Catherine McCammon kindly accepted the interview of MERDJ (Mössbauer Effect Reference and Data Journal) on this occasion. She shares with us her feelings, research experiences and recent highlights as well as her viewpoints on the future development of Mössbauer spectroscopy. We have no doubts that our readers will be deeply impressed by her research efforts and advices, as well as by her cycling life.

We also had the pleasure to receive the congratulations from Dr. Rudolf Rüffer & Dr. Aleksandr Chumakov as well as the nomination letter from Prof. Dr. Leonid Dubrovinsky, which we publish in this issue.

Let's read about Dr. Catherine McCammon's success from the events introduced in the yellow pages of this issue.
