

Integrating qualitative research in general practice to contextualize guidelines: A stepwise approach

Annick Nonneman, Manon de Montigny, Olivier Schmitz, Cécile Ponsar, Michel De Jonghe, Centre Académique de Médecine Générale, UCLouvain, Brussels, Belgium

CONTEXT

Clinical question

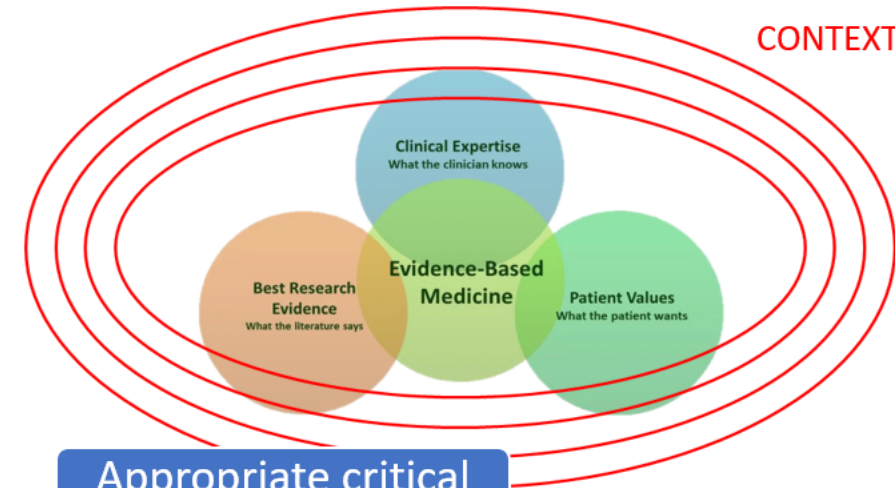

Qualitative studies

Confidence assessment of evidence

Cerqual GRADE

CONTEXT IN THE REALIST APPROACH (Pawson 1997)

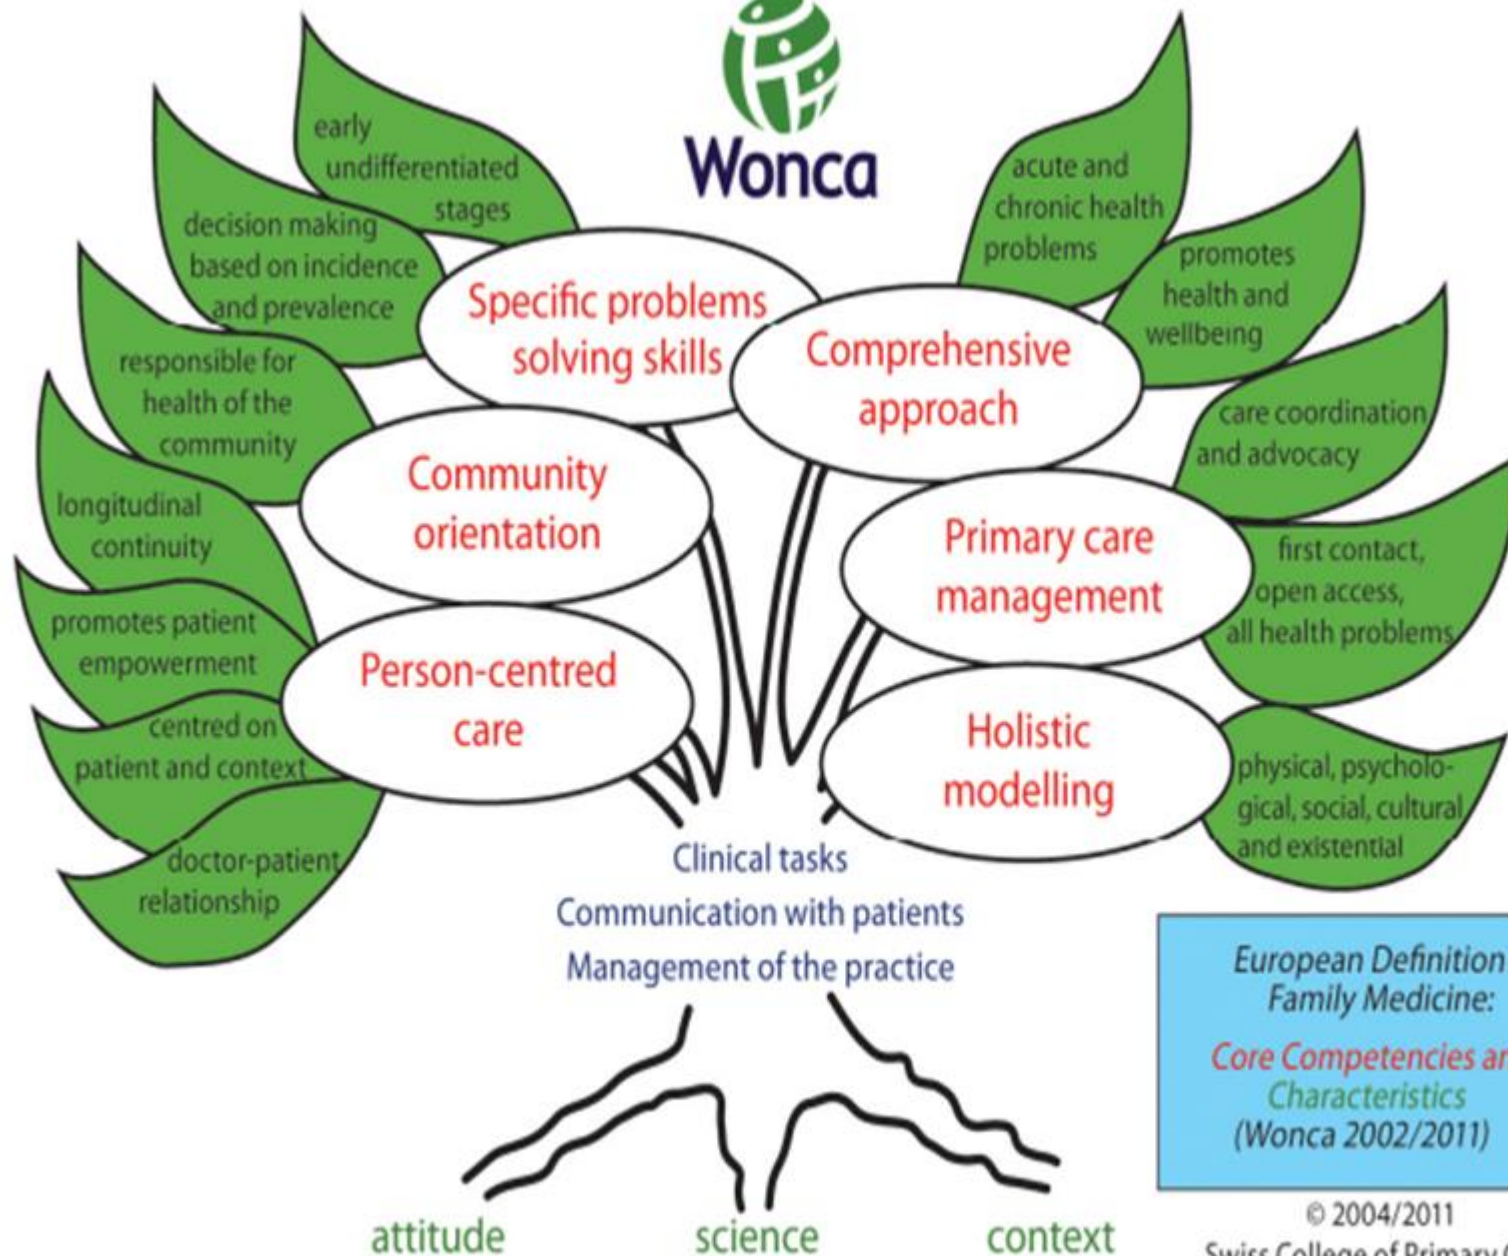

Appropriate critical reading framework

Criteria to have a confidence level

New evaluation tool

Testing and validation

Recommendations contextualized in particular clinical context
→ Facilitate EBM
