Author Keywords

acute care; biomarker; GFR; kidney function; nephron-protective strategies; penKid; point-of-care platform; Proenkephalin A 119-159; real-time measurement

Index Keywords

biological marker, biotin, citric acid, edetic acid, glucose, hemoglobin, proenkephalin, proenkephalin A 119-159, protein, unclassified drug, biological marker, proenkephalin; blood sampling, controlled study, human, immunochemistry, in vitro study, intermethod comparison, kidney function, Letter, limit of blank, limit of detection, limit of quantitation, measurement precision, microtiter plate assay, point of care testing, reproducibility, glomerulus filtration rate, kidney; Biomarkers, Glomerular Filtration Rate, Humans, Kidney
