

TABLE OF CONTENTS

CHAPTER I. FOREWORD AND AIM OF THE THESIS	1
CHAPTER II. INTRODUCTION	85
I. Nanomedicine and drug delivery.....	5
I.1. Nanomedicine structure.....	5
I.2. Nanomedicines for oral drug delivery.....	8
I.3. Nanomedicines for cancer therapy.....	9
II. Vitamin E.....	12
II.1. Vitamin E family.....	12
II.2. Biology of Vitamin E.....	13
II.3. Metabolic functions of vitamin E.....	19
II.4. Toxicity of vitamin E.....	28
II.5. Vitamin E and drug delivery applications.....	28
III. Chitosan and its derivatives.....	43
III.1. Production and properties of chitosan.....	43
III.2. Chemical grafting of chitosan with hydrophobic group.....	45
III.3. Chitosan derivatives for the delivery of poorly soluble drugs.....	46
IV. Self-assembled prodrugs.....	51
IV.1. Lipid-based self-assembled prodrugs.....	52
IV.2. Polymeric self-assembled prodrugs.....	56
V. Thesis background.....	58
VI. References.....	59
CHAPTER III. TCOL MODIFIED GLYCOL CHITOSAN FOR THE ORAL DRUG DELIVERY OF POORLY SOLUBLE DRUGS.....	75
I. Introduction.....	76
II. Materials and methods.....	78
II.1. Materials.....	78
II.2. Synthesis of the polymers.....	78
II.3. Critical micelle concentration.....	81
II.4. Size and morphology.....	82
II.5. Drug encapsulation.....	83
II.6. HPLC analysis.....	84
II.7. Caco-2 cells experiments.....	84
II.8. Statistics.....	86
III. Results and discussion.....	87

III.1. Polymer synthesis and characterization.....	88
III.2. Selection of self-assembling chitosan tocopherol derivatives.....	88
III.3. physicochemical properties of gc-tos.....	89
III.4. Drug encapsulation.....	91
III.5. Caco-2 experiments.....	94
IV. Conclusion.....	96
V. References.....	97
CHAPTER IV. SELF-ASSEMBLING DOXORUBICIN-TOCOPHEROL SUCCINATE PRODRUG AS A NEW DRUG DELIVERY SYSTEM: SYNTHESIS, CHARACTERIZATION AND IN VITRO ANTICANCER ACTIVITY.....	100
I. Introduction.....	102
II. Experimental.....	104
II.1. Materials.....	104
II.2. Instrumentation.....	104
II.3. Synthesis of n-d- α -tocopherol succinate derivative of doxorubicin	105
II.4. Synthesis of D- α -Tocopherol polyethylene 2000 succinate	106
II.5. Preparation of DOX-TOS nanoparticles	107
II.6. Physico-chemical characteristics of the nanoparticles	107
II.7. NMR of nanoparticles in water	107
II.8. Nanoparticle stability.....	108
II.9. Cell experiments.....	108
II.10. Statistics.....	109
III. Results and discussion.....	110
III.1. Synthesis and characterization of the n-dox-tos.....	110
III.2. Formulation of dox-tos nanoparticles.....	110
III.3. Physico-chemical characteristics of the dox-tos nanoparticles.....	111
III.4. Cytotoxicity and cellular uptake of n-dox-tos nanoparticles.....	116
IV. Conclusion.....	120
V. References.....	121
VI. Supporting Information.....	124
CHAPTER VII. DISCUSSION AND PERSPECTIVES.....	128
I. Main achievements of the thesis.....	129
II. Key questions.....	131
III. Perspectives.....	138
IV. References.....	142
