Author Keywords

Capillary electrophoresis; Hemoglobin; Hemoglobinopathy; Kinshasa; α -Thalassemia

Index Keywords

hemoglobin, hemoglobin A2, hemoglobin Barts, hemoglobin C, hemoglobin Kinshasa, unclassified drug, hemoglobin, hemoglobin A2, hemoglobin variant; African, alpha thalassemia, Article, capillary electrophoresis, case report, clinical article, erythrocyte count, gene, gene deletion, glucose 6 phosphate dehydrogenase deficiency, HbA1 gene, HbA2 gene, high performance liquid chromatography, human, infant, mean corpuscular hemoglobin, mean corpuscular hemoglobin concentration, mean corpuscular volume, multiplex ligation dependent probe amplification, phenotype, point mutation, Sanger sequencing, capillary electrophoresis, Democratic Republic Congo, hemoglobinopathy, procedures; Democratic Republic of the Congo, Electrophoresis, Capillary, Hemoglobin A2, Hemoglobinopathies, Hemoglobins, Hemoglobins, Abnormal, Humans
