

Erratum: Recommendations from the ICM-VTE: General

The Journal publishes corrections when they are of significance to patient care, scientific data or record-keeping, or authorship, whether that error was made by an author, editor, or staff. Errata also appear in the online version and are attached to files downloaded from jbjs.org.

In the article entitled “Recommendations from the ICM-VTE: General” (J Bone Joint Surg Am. 2022;104[Suppl 1]:4-162), by the ICM-VTE General Delegates, there was an error on pages 33 and 161. Specifically, in the section entitled “17 - Does administration of tranexamic acid (TXA) to patients undergoing orthopaedic procedures increase the risk of subsequent VTE?”, and in the note on page 161, the name “Armin Arish” should have read “Armin Arshi.”
