(LDK class 24-85), PCF Process
Chlorine Free and Heavy metal
absence.

The typography used in this issue
includes the Sorts Mill Goudy font
family by Barry Schwartz.

ABOUT THE AUTHORS

false mirror office is a collective of architects founded in 2015,
outcome of a fortunate encounter between young professionals
sharing the Genoa Polytechnic School as common background.
Its members experienced projects of all scales working with
leading European firms while sharing few selected themes of high
commitment.

Its manifold context spans from disciplinary matters to unrelated
ones: each project offers a chance connect them through the
design process while professional and academic events are the
platform to further discuss and share them in the Architectural
debate.

Believing that new in Architecture originates only as a reaction to
the preexisting, false mirror office re-discovers the past as the
present, re-signifies high as mass culture, re-values forms and
functions.

As a matter of fact, false mirror office mis-represents architecture.

false mirror office was established in Genova in 2015 by Andrea
Anselmo, Gloria Castellini, Guya Di Bella, Filippo Fanciotti,
Giovanni Glorialanza and Boris Hamzeian.
