

### Erratum

In the paper “*In Vitro* Hyperresponsiveness to Tumor Necrosis Factor- $\alpha$  Contributes to Adipokine Dysregulation in Omental Adipocytes of Obese Subjects” by Eléonore Maury, Laurence Noël, Roger Detry, and Sonia M. Brichard (*J Clin Endo Metab* 94:1393–1400, 2009), the first sentence of the Conclusions in the Abstract contains an error introduced by the printer. The sentence should read: In obesity, TNF- $\alpha$  that is over other SVC-secreted factors, a crucial determinant of adipokine dysregulation acts on enlarged adipocytes, which are hyperresponsive to this triggering signal. *The printer apologizes for the error.*
