

Tailoring Clinical Practice Guidelines by Integrating Qualitative Research

The Question of Context in General Practice

Annick Nonneman, Manon de Montigny, Olivier Schmitz, Cécile Ponsar, Michel De Jonghe

Step 1 Determine the best critical reading framework for evaluating the quality standards of qualitative studies in GP

- Method: Comparative study
- Key points of discussion
 - Transparency in the decision-making process
 - 3 categories of criteria
 - The context!
- No publication standard meets our goal

Criteria	Literature	COREQ	SRQR	RATS
1. Title, summary, introduction	XX	0	XX	0
2. Problem and research question	XX	0	XX	XX
3. Context	X	0	X	0
4. Reflexivity	XX	XXX	XX	X
5. Sampling strategy				
Recruitment	XXX	XXX	XX	XXX
Sampling characteristics	XXX	XXX	XXX	XXX
Saturation	XXX	X	XX	XX
6. Data collection	XXX	XX	XXX	X
7. Data processing and data analysis	XXX	XXX	XX	XXX
8. Triangulation	XXX	XXX	XXX	XXX
9. Discussion				
Synthesis, interpretation and contributions	XXX	X	XXX	XXX
Transferability	XXX	XX	XX	XX
10. Ethical issues	X	0	XXX	XX
11. Conflicts of interest, possible funding	X	0	XX	X

Ranking : 0 = unreported; X = reported ; XX = well-described ; XXX = very well detailed

Step 2 Determine the necessary quality criteria to ensure confidence in qualitative outcomes for contextualization

Centre Académique de Médecine Générale, UCLouvain, Brussels, Belgium
