Preface	1
E.M. Gaigneaux, D. Debecker, M. Devillers, S. Hermans, C. Kirschhock, J. Martens and P. Ruiz	
Can Ni phosphides become viable hydroprocessing catalysts?	3
S. Soled, S. Miseo, J. Baumgartner, J. Guzman, T. Bolin and R. Meyer	
Chemisorption–XRD particle size discrepancy of carbon supported palladium: Carbon decoration of Pd?	9
J.M.M. Tengco, Y.K. Lugo-José, J.R. Monnier and J.R. Regalbuto	
Catalysts based on pillared clays for the oxidation of chlorobenzene	15
A. Aznárez, R. Delaigle, P. Eloy, E.M. Gaigneaux, S.A. Korili and A. Gil	
Tailoring preparation, structure and photocatalytic activity of layer-by-layer films for degradation of different target molecules	28
J. Rongé, J. Bets, S. Pattanaik, T. Bosserez, S. Borellini, S. Pulinthanathu Sree, G. Decher and J.A. Martens	
Effects of amine structure and base strength on acid–base cooperative aldol condensation	35
J. Lauwaert, E. De Canck, D. Esquivel, P. Van Der Voort, J.W. Thybaut and G.B. Marin	
Coprecipitation: An excellent tool for the synthesis of supported metal catalysts – From the understanding of the well known recipes to new materials	46
M. Behrens	
Counteranion effects on the catalytic activity of copper salts immobilized on the 2,2'-bipyridine-functionalized metal–organic framework MOF-253	55
P. Valvекens, E.D. Bloch, J.R. Long, R. Ameloot and D.E. De Vos	
Ti ³⁺ -containing titania: Synthesis tactics and photocatalytic performance	60
W.H. Saputera, G. Mul and M.S. Hamdy	
Morphological effects of CeO ₂ nanostructures for catalytic soot combustion of CuO/CeO ₂	67
K. Nakagawa, T. Ohshima, Y. Tezuka, M. Katayama, M. Katoh and S. Sugiyama	
A universal method to form Pd nanoparticles on low-surface-area inorganic powders and their support-dependent catalytic activity in hydrogenation of maleic acid	72
M.A. Kulagina, E.Yu. Gerasimov, T.Yu. Kardash, P.A. Simonov and A.V. Romanenko	
Role of shaping in the preparation of heterogeneous catalysts: Tableting and slip-casting of oxidation catalysts	81
V.G. Baldovino-Medrano, M.T. Le, I. Van Driessche, E. Bruneel, C. Alcázar, M.T. Colomer, R. Moreno, A. Florencie, B. Farin and E.M. Gaigneaux	
Ternary and quaternary Cr or Ga-containing ex-LDH catalysts—Influence of the additional oxides onto the microstructure and activity of Cu/ZnAl ₂ O ₄ catalysts	92
S. Kühn, J. Schumann, I. Kasatkin, M. Hävecker, R. Schlögl and M. Behrens	
Design of multicomponent aerogels and their performance in photocatalytic hydrogen production	101
R.O. da Silva, F.J. Heiligtag, M. Karnahl, H. Junge, M. Niederberger and S. Wohlrab	
Pd–Cu interaction in Pd/Cu-MCM-41 catalysts: Effect of silica source and metal content	108
P. Benito, M. Gregori, S. Andreoli, G. Fornasari, F. Ospitali, S. Millefanti, M.S. Avila, T.F. Garetto and S. Albonetti	
Ionic liquid-initiated polymerization of epoxides: A useful strategy for the preparation of Pd-doped polyether catalysts	116
U. Arnold, C. Altesleben, S. Behrens, S. Essig, L. Lautenschütz, D. Schild and J. Sauer	
A novel preparation method for “small” eggshell Co/γ-Al ₂ O ₃ catalysts: A promising catalytic system for compact Fischer–Tropsch reactors	125
L. Fratalocchi, C.G. Visconti, L. Lietti, E. Tronconi, U. Cornaro and S. Rossini	
Kaolinite-titanium oxide nanocomposites prepared via sol–gel as heterogeneous photocatalysts for dyes degradation	133
L.V. Barbosa, L. Marçal, E.J. Nassar, P.S. Calefi, M.A. Vicente, R. Trujillano, V. Rives, A. Gil, S.A. Korili, K.J. Ciuffi and E.H. de Faria	
The rational synthesis of Pt–Pd bimetallic catalysts by electrostatic adsorption	143
H.-R. Cho and J.R. Regalbuto	
Improvement in the coating homogeneity in electrosynthesized Rh structured catalysts for the partial oxidation of methane	154
P. Benito, M. Monti, W. De Nolf, G. Nuyts, G. Janssen, G. Fornasari, E. Scavetta, F. Basile, K. Janssens, F. Ospitali, D. Tonelli and A. Vaccari	
Synthesis of graphene-like MoS ₂ nanowall/graphene nanosheet hybrid materials with high lithium storage performance	165
J. Guo, X. Chen, S. Jin, M. Zhang and C. Liang	
Photocatalytic property of strontium-niobium mixed oxide prepared by utilizing organic mediators to the overall splitting of H ₂ O	172
Y. Sakata, H. Munemasa, S. Suenaga, T. Onishi, H. Imamura and J.N. Kondo	

Nickel silicides prepared from organometallic polymer as efficient catalyst towards hydrogenation of phenylacetylene K. Yang, X. Chen, J. Guan and C. Liang	176
Incorporation of the precursors of Mo and Ni oxides directly into the reaction mixture of sol–gel prepared γ -Al ₂ O ₃ -ZrO ₂ supports – Evaluation of the sulfided catalysts in the thiophene hydrosulfurization E.P. Baston, A.B. França, A.V. da S. Neto and E.A. Urquieta-González	184
Catalytically active gauze-supported skeletal nickel prepared from Ni–Zn alloys electrodeposited from an acetamide–dimethyl sulfone eutectic mixture K.L. Fow, M. Ganapathi, I. Stassen, K. Binnemans, J. Fransaer and D.E. De Vos	191
Mechanochemical preparation of Ag catalysts for the <i>n</i> -octane-SCR de-NO _x reaction: Structural and reactivity effects K. Ralphs, S. Chansai, C. Hardacre, R. Burch, S.F.R. Taylor and S.L. James	198
Application of the Catalyst Wet Pretreatment Method (CWPM) for catalytic direct synthesis of H ₂ O ₂ P. Biasi, S. Sterchele, F. Bizzotto, M. Manzoli, S. Lindholm, P. Ek, J. Bobacka, J.-P. Mikkola and T. Salmi	207
Preparation of bimetallic gold catalysts by redox reaction on oxide-supported metals for green chemistry applications E.A. Redina, O.A. Kirichenko, A.A. Greish, A.V. Kucherov, O.P. Tkachenko, G.I. Kapustin, I.V. Mishin and L.M. Kustov	216
Preparation of porous ceramometal composites through the stages of mechanical activation and hydrothermal partial oxidation of Me–Al powders S.F. Tikhov, V.A. Sadykov, K.R. Valeev, A.N. Salanov, S.V. Cherepanova, Y.N. Bepalko, V.E. Ramanenkau, Y.Ya. Piatsiushyk and S.V. Dimov	232
