

Architectural Histories is the international, blind peer-reviewed scholarly journal of the **European Architectural History Network (EAHN)** that creates a space where historically grounded research into all aspects of architecture and the built environment can be made public, consulted, and discussed. The journal is open to historical, historiographic, theoretical, and critical contributions that engage with architecture and the built environment from a historical perspective. *Architectural Histories* also encourages authors to submit articles on non-European topics, including regions, themes, time periods, characters, works, and fields, that have been traditionally excluded from the canon of architectural history.

Architectural Histories is indexed in SHERPA RoMEO, Directory of Open Access Journals (DOAJ), EBSCOHost, Google Scholar, the Emerging Sources Citation Index, the Avery Index to Architectural Periodicals, the Italian ANVUR (classe A - Area 8), the European Reference Index for Humanities and Social Sciences (ERIH PLUS), the Cengage Learning and SCOPUS. In addition, *Architectural Histories* is available for harvesting via OAI-PMH.

AH - Call for applications for the Editorial Board of Architectural Histories

Posted by Manuel Sánchez García on 2022-10-04

Architectural Histories invites applications for membership on its general Editorial Board. Members of the Editorial Board work with the Editor-in-Chief to guide potential contributions, from submission through peer review and copy-editing stages of publication. Members thus carry considerable responsibility for the content and quality of the Journal.Deadline October 31st The Board, in keeping [...]
