Error in Table

In the original publication [1], there was a mistake in **Table 3** as published. **Table 3** was supposed to present factors associated with knowledge about the existence and definition of asymptomatic malaria among HCWs. While **Table 4** presents the factors associated with knowledge about diagnosis and treatment of asymptomatic malaria among HCWs. The corrected **Table 3** appears below. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.

Table 3. Factors associated with knowledge about the existence and definition of asymptomatic malaria among HCWs.
