

Appendix 1b: Individual P300-waveforms elicited by the deviant stimuli at electrode position Pz of the four patients in the (sub)acute stage (T1) and in the chronic stage (T2), T1 = black, T2 = red. Peak amplitudes (μV) and peak latencies (ms) of the P300 are measured at the electrode position Pz. Values indicated in red are outside of the normative range (Aerts et al., 2013).

Patient 1

	T1	T2
Peak amplitude (μV)	9.71	5.20
Peak latency (ms)	510	694

Patient 2

	T1	T2
Peak amplitude (μV)	4.35	6.39
Peak latency (ms)	348	320

Patient 3

	T1	T2
Peak amplitude (μV)	6.39	5.24
Peak latency (ms)	504	480

Patient 4

	T1	T2
Peak amplitude (μV)	8.95	7.94
Peak latency (ms)	598	474
